# fuse international conference

on knowledge exchange in public health

SEPTEMBER 22-23, 2020

Crowne Plaza Hotel  
Newcastle upon Tyne, UK

#fuseKEC20

*“Learning from setbacks and successes”*  
fuseconference.net

The evidence base on successful practices in knowledge exchange is growing rapidly but much less attention is given to documenting setbacks when **academics, practitioners and policy makers** collaborate (or not!) to develop, exchange or use different types of evidence. We believe that learning from these setbacks is just as important as celebrating successes.

The conference aims to create a safe space for attendees to reflect on the potential threats to successful knowledge exchange, to develop important lessons on how knowledge exchange practices and research can be improved, turning setbacks into successes.

Submit your  
abstract - deadline  
28 February 2020
